

Technical Data Sheet

HPC-0501 HUBER SPRAY POWDER FINE (18-22)

Anti set off spray powder of 18-22 micron size for general purpose printing

- Features** :
- Better ink set off protection for high pile heights and heavy prints
 - Can be used even during post printing operations
 - Promotes slip so that helps sheets to slip over and reduce static charge.
 - Particle size of 18-22 microns to be used for all general purpose printing on small to medium size presses
 - Reduces the amount of blanket wash ups and press down time.
 - Safe in handling.
 - Good for air guns and electrostatic units

Application : Use as instructed by spray unit manufacturer.

Inadequate powder can result in inadequate coverage and may lead to set off and poor ink trapping due to lack of oxygen

Packaging : 1 kg

Properties :

Colour	White
Odour	No characteristic Odour
Bulk Density	0.74 - 0.79
pH	5 - 6
Appearance	Flowy powder
Micron Size	18 - 22 microns
Coated/Uncoated	Partially coated
Solubility	Partially soluble in water
Moisture Content	6 - 8 %
