

## Technical Data Sheet

### HPC-0531 HUBER SPRAY POWDER EXTRA-FINE (16-18)

Anti set off spray powder of 16-18 micron size for general purpose printing.

- Features** :
- Better ink set off protection for high pile heights and heavy prints
  - Can be used even during post printing operations
  - Promotes slip so that helps sheets to slip over and reduce static charge.
  - Particle size of 16-18 microns to be used for all general purpose printing on small to medium size presses
  - Reduces the amount of blanket wash ups and press down time.
  - Safe in handling.
  - Good for air guns and electrostatic units

**Application** : Use as instructed by spray unit manufacturer.

Inadequate powder can result in adequate coverage and may lead to set off and poor ink trapping due to lack of oxygen

**Packaging** : 1 kg

**Properties** :

|                         |                            |
|-------------------------|----------------------------|
| <b>Colour</b>           | White                      |
| <b>Odour</b>            | Natural Starch             |
| <b>Bulk Density</b>     | 0.86 - 0.94                |
| <b>pH</b>               | 5.0 - 6.0                  |
| <b>Appearance</b>       | Flowy powder               |
| <b>Micron Size</b>      | 16 - 18 microns            |
| <b>Coated/Uncoated</b>  | Partially coated           |
| <b>Solubility</b>       | Partially soluble in water |
| <b>Moisture Content</b> | 11 - 13 %                  |
